SUMMARY

Mid/Regular DevOps Engineer specializing in AWS CloudOps, multi-cloud networking, and container orchestration. Proven track record of designing secure cloud architectures, automating CI/CD pipelines via GitOps, and supporting highly available 24/7 production environments. Holds AWS and Aviatrix credentials with a strong foundation in Linux administration, infrastructure as code, and observability.

WORK EXPERIENCE

Reply | DevOps Engineer (Mid) | AWS CloudOps | May 2026 – Present

Technology: AWS (VPC, TGW, Route 53, Lambda), Multi-Cloud networking (AWS, Azure, GCP, On-Premise), Terraform, Aviatrix, K8s, OpenShift, ArgoCD, Kafka

- **Multi-Cloud Networking & AWS CloudOps:** Designed, implemented, and maintained Transit-Spoke network architectures across hybrid environments (AWS, Azure, GCP, On-Premise) using Terraform and Aviatrix Cloud Native Security Fabric.
- **GitOps & Automation:** Migrated CI/CD pipelines from Jenkins to GitHub Actions and implemented a GitOps model (ArgoCD, Kustomize) for managing Red Hat OpenShift clusters. Automated environment provisioning and tenant resource allocation using a custom-built CLI tool.
- **Zero Trust Architecture & Security:** Implemented microsegmentation (Distributed Cloud Firewall) and secure egress policies, optimizing data transfer costs. Automated the multi-stage rotation of mTLS certificates (Double-Trust mode), passwords, and encryption keys (SOPS/GPG) with zero production downtime.
- **Data Streaming Platforms & On-call Support:** Administered distributed Apache Kafka and Confluent clusters, optimizing performance metrics. Actively participated in 24/7 on-call rotations, providing L2/L3 support and ensuring strict SLA compliance.
- **Troubleshooting & Observability:** Resolved complex L3-L7 network incidents and managed Service Mesh (Istio) architecture. Developed custom Python integrations (AWS Lambda) to automate infrastructure ticketing between monitoring systems (CoPilot, Grafana) and ITSM (ServiceNow).

Stefanini EMEA | Senior Support Engineer | Jun 2025 – May 2026

Technology: ServiceNow, Active Directory, MS Exchange, MS Intune, SharePoint Online, Citrix Virtualization

- Provided first- and second-line technical support for hardware, software, and network systems in line with defined SLAs.
- Diagnosed and resolved tickets to minimize downtime, with detailed logging and incident management in ServiceNow.
- Created and updated knowledge base articles; followed up with users post-resolution to ensure satisfaction.

- Supported onboarding and training for new employees; worked in a 24/7 shift system with international teams.

WestPC | IT Support Consultant (L1/L2) | Jan 2025 – May 2025

Technology: Active Directory, IAM, Windows, Mobile, Networking

- Provided L1/L2 helpdesk support, diagnosing and resolving ongoing hardware, network, and application incidents.
- Managed identity and access (IAM) within Active Directory, including user account creation, group management, and precise permission assignments.
- Configured workstations and mobile devices, installed required software, and seamlessly integrated endpoints into the corporate network.
- Maintained IT hardware lifecycle, executed data archiving processes, and generated technical summary documentation.

Sperasoft | NOC Engineer (Mid) | Aug 2024 – Jan 2025

Technology: AWS (EC2, AMI, Lambda, CloudWatch), Jenkins, Linux, Windows, Bash, Python, RabbitMQ, JenkinsBot, Slack, Jira

- Proactively monitored online games and related cloud systems (24/7), participating in on-call rotations to ensure continuous service availability and rapid incident response.
- Analyzed logs, metrics, and system performance indicators using AWS CloudWatch and custom tooling to assess technical and functional health.
- Triageed, prioritized, and escalated incidents to on-call DevOps, TechOps, and production teams providing clear, concise technical summaries.
- Executed patch and build deployments via Jenkins, including post-deployment smoke testing to verify system integrity.

Kamil Platek | Software Engineering Intern | 3 Months (Vocational Training)

Technology: B2B E-commerce Platform (US Market), Laravel, React.js, Jira, Confluence, SDLC

- Supported the maintenance and development of a large-scale B2B e-commerce platform for the US market during technical school vocational training.
- Gained hands-on experience in a commercial production environment, learning software design patterns and troubleshooting with Laravel and React.js.
- Adopted professional IT workflows and SDLC standards, utilizing the Atlassian ecosystem (Jira, Confluence) for task management.
- Worked under the direct supervision of a Team Lead Full Stack Developer, developing analytical problem-solving skills and business logic comprehension.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, VPC, S3, IAM, Route 53, Lambda, CloudOps), Aviatrix, Azure, GCP, Terraform

Containers & Orchestration: Red Hat OpenShift (ROSA/OSD), Kubernetes, Docker

CI/CD & GitOps: ArgoCD, Kustomize, GitHub Actions, Jenkins, Ansible

Data Streaming & Platforms: Apache Kafka, Confluent Platform, KRaft, Schema Registry, ZooKeeper

Observability & Security: Grafana, Prometheus, OpenTelemetry, Istio, Splunk, SOPS, GPG, mTLS, Zero Trust

Operating Systems & Scripting: Linux (Ubuntu, CentOS, Red Hat), Windows Server, Python, Bash, Git

CERTIFICATIONS & TRAINING

- Aviatix Certified Engineer (ACE) – Basic, Operational, Professional
- AWS Certified Cloud Practitioner | AWS Certified CloudOps Associate
- CompTIA Linux+
- Begin Your DevOps Career As a Newbie – AWS, Linux, Bash, Python, Jenkins, Ansible, GitOps, Docker, Kubernetes & Terraform – Udemy
- All-in-One Course for Learning Terraform – Udemy
- NGINX Fundamentals: High Performance Servers – Udemy
- Advanced Concepts of the Django Framework
- Python for Intermediates
- MySQL Database Creation and Management

EDUCATION

Wyższa Szkoła Zarządzania i Bankowości, Cracow | Engineer's Degree - Computer Science (Part-time) | 2024 – Present

Zespół Szkół im. ks. Józefa Tischnera, Dobczyce | IT Specialist (Vocational Degree) | May 2024
